

Golden rules for using grinders or scabblers with transformers.

- Each appliance requires its own 5kva transformer
- Each transformer must be plugged into seperate 240v wall socket - no 240v leads or not same socket.
- 32 amp 110v 4mm extension leads must be used up to a maximum of 4 leads per appliance.
- Lift machine off floor before starting
- Do not turn switch to run for longer than few seconds
